

Stefan R. Dandelles Speaker at ABA: An Analysis of Fidelity Claims for the Modern World

Stefan Dandelles, Co-Managing Partner of KD's Chicago office will be a speaker at the 2018 Fidelity and Surety Law Committee's (FSLC) fall meeting, titled "An Analysis of Fidelity Claims for the Modern World."

Mr. Dandelles will specifically be speaking on Thursday, November 8th on the topic of: "The Fidelity Recovery Playbook: Practical Strategies for Maximizing Recovery."

Fidelity insurers are leaving money on the table. The objective of this presentation is to ensure that first-party claims handlers and recovery/ subrogation personnel are working together strategically to identify potential recovery targets (defaulters, confederates, auditors and banks), and that they can, where appropriate, deal with first-party and recovery efforts concurrently, so as to maximize recovery. Topics include the use of Interim Recovery Agreements (also known as Mitigation Agreements) to "jump the gun" on recovery efforts before the carrier is in a formal subrogation position, and practical litigation strategies and tools carriers can use to maximize recoveries as against each type of target.
